Community Carnival Arousing Interest

Grand Prizes Increase Interest in
"Carnival Here on" July 20-22.

The big coming event on July 20 and 22 is the Community Carnival in aid of the rink. The major prizes are a handsome Chesterfield suite valued at \$375 and an electric Orthophonic valued at \$155, which are now on display.

A number of young people of the town have kindly offered to assist the carnival management in the operation of the booths, at which many new novelties will be given as prizes to the lucky competitors. There will be the usual jitney dance platform at which the celebrated Knights of Rhythm will play.

The proceeds of the carnival will go towards the deficit on the operation of the skating rink, therefore it is worthy of the united support of all the citizens.

GEO. A. RITCHIE LAID TO REST ON FRIDAY

The funeral of George A. Ritchie, forest ranger, was held last Friday afternoon, the Anglican service for the burial of the dead being read by the Rev. Randolph Powell, rector of Macleod, in the absence of Rev. A. D. Currie at Banff.

The pall-bearers were W. L. Rippin, Frank Graham Sr., O. E. S. White-side, Harry Antel, Joe Plante, and Wes. Johnson.

Besides many from town who attended the funeral service, the following officials from the Forestry department and friends from Pincher Creek attended: Chas. Morse, district forest inspector, and T. F. Pfeiffer, assistant forestry inspector, of Calgary; J. P. Alexander, forest supervisor, and E. Huestis, assistant forest supervisor, of Pincher Creek; Mr. Briggs, assistant forest ranger, South Fork; Mrs. Lowry, Mrs. McDonald, Mrs. Lang, Geo. Ballantyne and other friends from Beaver Mines; H. Bosenberry, Pincher Creek; Mr. and Mrs. Dick Harris, Pincher Creek; Mr. McRoberts, Pincher Creek, and a number of others whose names were not obtained.

CARD OF THANKS

Mrs. Alexia Hall and family desire to express their thanks for many expressions of sympathy received in the death of Mr. G. A. Ritchie, to those who kindly loaned cars, and also those who sent flowers, as follows:

Mr. and Mrs. Whiteside and Adele, Mr. and Mrs. J. H. Boulton, staff of Crows Nest Forestry Branch, Pincher Creek; Mrs. A. Power and family, Pincher Creek; Mr. and Mrs' J. A. Devine, Mr. R. F. Barnes, Mr. D. E. Hogan, Mr. and Mrs. Jas. Scott, Mr. and Mrs. H. C. McBurney, Mr. and Mrs. R. M. Greenhalgh, Mr. and Mrs. J. Plante, Mr. and Mrs. Harry Antel, Mrs. D. Johnson, H. Bosenberry, Pincher Creek; the Graham Family, Mr. and Mrs. W. L. Rippin, Mr. and Mrs. Alex. Morency, Blairmore.

VISITOR FROM NEW YORK CITY

Mr. Fred Pye arrived on Tuesday for a visit with his sister, Mrs. Fred Thom, whom he had not seen since he left Estevan, Saskatchewan, in 1911, where they were living at that time. Since then he has lived on the Pacific coast, and taking up the study of art, spent six years in Paris and various places in Italy, returning to New York, where he has since resided. Exhibitions of his work have been held in Edmonton, Regina and Calgary. His plans on going to Vancouver and then returning via Banff, where he will probably stay for awhile. One of the places of interest he visited while studying in Europe was the island of Corsica, the birthplace of Napoleon, where the room in which the "Little Corporal" was born is now incorporated into part of a museum.

Mr. Pye was very much impressed with the fine view from the highway a short distance west of Coleman, which overlooks the valley in which the Legal farm is situated and through which the C.P.R. line threads its way to Crows Nest.

ST. ALBAN'S CHURCH, COLEMAN

Sunday, July 14, Masses 11:15 a.m. Wednesday, July 17, Sunday School and congregational picnic at Crows Nest Lake.

BROTHER OF COLEMAN LADY STARTS ON AERIAL ADVENTURE

The Toronto Star and also the Globe recently carried a feature story with illustrations on the start of a trip by hydroplane to seal the treaty of the last unceded Indian lands in the whole Dominion of Canada, entailing a month's journeying across the barren lands of the most northerly section of Ontario. W. C. Cain, a brother of Mrs. T. B. Smith, of Coleman, who is deputy minister of lands and forests in the Ontario government, has charge of the negotiations, and the pictures show the start of the Moth seaplane from Toronto harbor, in which are included photos of his wife and daughter Dorothy anxiously watching the plane as it lifts from the water on the start of its northward flight. Captain W. Roy Maxwell is the pilot, and at Remi Lake, near Cochrane, they were joined by Dominion officials who will take part in the negotiations.

BOYCE-LOCKHART

Jean Miller, daughter of Mrs. John Boyce and the late Mr. John Boyce, Coleman, and Mr. Charles Lockhart, of Cadomin, were united in marriage at the United Church manse, Westlock, on the evening of the 29th June.

The bride looked lovely in a gown of beige georgette, trimmed with lace and with bat to match.

She carried an exquisite bouquet of Columbia roses. Mrs. Grelle Goddard of Calder attended the bride and Mr. Fred Gohdall assisted the bridegroom.

Rev. D. K. Allan performed the marriage ceremony.

A wedding supper was served after the ceremony.

The bride and bridegroom motored back to Edmonton where the honeymoon will be spent.

ROD & GUN CLUB COMPETITION NEXT SUNDAY

The first competition of the season will be held on Sunday. Parties who intend going should leave their names at once at The Journal office, with the 50c entry fee to be paid to Chas. MacKenzie, secretary. Notice of time of starting will be posted in a prominent place, as at time of publication it was not definitely stated. There promises to be a large number of members attend.

HEAVYWEIGHT CHAMPIONSHIP PICTURES AT PALACE

On Monday the exclusive motion pictures of the international heavyweight boxing contest between Max Schmeling, of Germany, and Paulino Uzudun of Spain will be the big feature at the Palace, which will attract all the fans of the Crows Nest Pass.

INTERNATIONAL DIRECTORS TO MEET ON FRIDAY

A meeting of the directors of the International Coal & Coke Co. Ltd. is to be held here on Friday, at which the president, Mr. A. C. Flumerfelt will preside.

CHAMPION IS DEFEATED

Luke Lindoe, star tennis player and holder of the 1928 McGillivray Cup championship, competed by memory of Coleman club, was defeated last evening by Malcolm McCallum, the score being Lindoe 7-5; McCallum 6-2, McCallum 6-2.

LOANS TO BARBERS TOTAL \$30,000.00

Nearly \$30,000.00 to be spent on programmes of extensions and developments have been approved by the Board of Trade. The amount, ten millions each goes to Montreal and Vancouver, \$5,000.00 for Halifax, and balance for Three Rivers and Chicoutimi, Quebec.

THE AVERAGE CASH INCOME PER FARM HOUSE IN THE PRAIRIE PROVINCES

was \$2,100.00, exclusive of the value of food, meat, vegetables and other commodities produced and retained by the farmer for his own use, according to the Nor' West Farmer, Canadian farm journal published at Winnipeg.

THE YOUNGER GENERATION, WE ARE TOLD, IS APT TO BE LED TO FIND ITS OWN AMUSEMENT AND ENTERTAINMENT, QUITE TO THE EXTENT OF THE WOMAN WHO LEFT HER 7-MONTHS OLD BABY ASLEEP IN THE WINDSOR STREET STATION, MONTREAL, WHILE SHE WENT TO THE CLOTHING STORE TO GET A SUIT FOR THE LADIES' WAITING ROOM AND CARED FOR ITSELF.

SEVERAL HOURS LATER THE MOTHER RETURNED AND WAS TOLD OF ITS WHEREABOUTS. IT WAS STILL SLEEPING AND SHE DECIDED TO HAVE HER SLEEP BEFORE SHE "DISTURBED" IT.

KEEP THE PEOPLE OF COLEMAN POSTED

ON WHAT THE STORES HAVE TO OFFER BY PERSISTENT ADVERTISING. THEY LOOK FOR THE NEWS OF THE STORES AS MUCH INTEREST AS THEY DO THE LOCAL NEWS.

MISSES MADELINE CHARDON OF BLAIRMORE

held a picnic for her music class pupils on Wednesday of last week at Burns falls, and the young folks spent a jolly time.

Modern Transportation

Speed means nothing to this young Englishman, son of the Winnipeg aviator, M. Hollek-Kanyon. He is seen this summer arriving aboard the Cunard Aurora to join his dad. His mother and sister superintended his early efforts. The Cunard Line taught him some aeronautics as the Aurora passed under the famous Quebec Bridge, clearing it by only a few feet.

Local News

Born: To Mr. and Mrs. A. S. McLintock, July 8th, a daughter.

Mrs. Geo. Morgan and son Irv left on Monday for a visit to Vancouver and Victoria.

Mr. and Mrs. Malcolm Morrison of Midlandvale, Alta., were here on Saturday and Sunday, visiting old friends.

Mrs. Frank Celli left on Monday morning for Creston to spend a few weeks there during the busy fruit season.

J. L. Lonsbury has almost completed the framework of the addition to his house which he recently purchased, and will move in very shortly.

Mr. and Mrs. Dave Young of Drumheller, and their children, are visiting this week at the home of Mr. and Mrs. John Burrell.

H. W. Collins, brother of Mrs. C. Devine, and his bride, stayed over for a day or two last week on their honeymoon trip from Saskatchewan.

Miss Kraft of the hospital staff returned to Edmonton last Friday. Miss Gray, formerly of Boston, is at present assisting on the nursing staff.

Mrs. Jas. Davey of Macleod and Mrs. J. Hill of Belgrave were visitors with Mrs. Robert Holmes during the week.

I. W. Northwood is this week reviewing the Bank of Commerce during the absence of Mr. Price on two weeks' holidays.

Tickets for the Orthophonic and Chesterfield to be awarded as grand prizes at the carnival are being sold very quickly, especially since the prizes have been placed on display.

Keep the people of Coleman posted on what the stores have to offer by persistent advertising. They look for the news of the stores as much interest as they do the local news.

Miss Madeline Chardon of Blairstown held a picnic for her music class pupils on Wednesday of last week at Burns falls, and the young folks spent a jolly time.

SHOWER AT WINNIPEG FOR A DRUMHELLER BRIDE-ELECT

Mrs. E. R. Wright and Mrs. W. mississippi shower held in honor of Miss (Mickey) Hadfield, bride-elect of Drumheller, formerly of Coleman, at the home of Mrs. D. M. Dohlie, 688 Prince Rupert Ave., Winnipeg, recently.

The room was beautifully decorated with streamers and wedding bells. The table was decorated with snap dragons and sweet peas, with tall pink tapers at each end, a miniature bride and groom being in the centre.

The bride-elect then entered the room escorted by the intended groom, two sisters, Mrs. E. R. Wright and Mrs. W. Harmer, and placed under a wedding bell on her throne, which was decorated in white tulle and then strewed with rose petals. A decorated wagon, carrying the numerous presents, was drawn by Audrey Harmer and Margaret Dohlie.

After the display of presents, the bride-elect was called on for a speech.

Tea was then served and a most enjoyable evening was spent by all. The guest list included Miss A. Hadfield, Mesdames E. R. Wright, W. Harmer, D. M. Dohlie, H. Leigh, A. Harmer, G. Beaumont, L. Green, J. Troup, J. Stacey, W. Raines, J. Macintosh, W. Haire, R. Smyth, W. Graham, R. McDonald, J. Gardner, E. Eburne, W. Webster, J. Stables, R. Harmer, E. Watson, Misses K. Haire, M. Wright, P. Wright, J. Dohlie, M. Leigh, M. Dohlie, A. Harmer, M. Eburne, H. Smyth, J. E. Harmer.

Council to Try Oiling Highway

Effort Will be Made to Minimize Nuisance from Dust in the Business Section

A recent meeting of the town council decided to try oiling a piece of the highway through town to ascertain what effect it will have in keeping down the dust. A wind such as that experienced on Tuesday caused discomfort in all the Pass towns, and at Pernie the fire hose was kept going to minimize the nuisance.

The school board met last week and awarded the painting contract for the three cottage schools and the caretaker's house to George Graham, and Margaret Dohlie.

LASLETT'S SALE CONTINUES

The big midsummer sale at this store opened with a flourish on Saturday, and the staff were very busy serving people from the various towns of the Pass. Many bargains are offered in all lines of summer merchandise for women and children and large posters show many money-saving bargains worth taking advantage of.

NOTICE TO CREDITORS AND CLAIMANTS

In the estate of THOMAS JOSEPH NICHOLAS, late of Coleman, Clerk, Harmer were joint hostesses at a deceased.

The Misses Ethel and Margaret Dunlop, Coleman, Alta., and Harold D. Stafford, Vancouver, were Dominion Day guests of their aunt and uncle, Mr. and Mrs. H. G. Phillips, at Regina, Sask. They left for Edmonton where the Misses Dunlop will take teachers' summer courses at the university and Mr. Stafford will take a course in law.

CARNIVAL GRAND PRIZES

All ticket sellers for the grand prizes for Coleman Community Carnival are requested

to make their returns in cash as early as possible. Those requiring additional books of tickets may obtain same from McPuirney's Drug Store or The Journal Office. Books of 20 tickets for \$4.50.

WHAT LUBRICATION IS TO MACHINERY-- Gum-Dipping Is To TIRES

As the film of oil prevents friction of metal parts, so does the film of rubber surrounding every fibre and strand of Firestone cord, protect it against heat and friction within the cord due to continued flexing.

Gum-Dipping assures you most mileage for least money—with greatest safety, comfort and satisfaction—when you equip your car with Firestones. See your local Firestone Dealer.

MADE IN HAMILTON, CANADA, BY
FIRESTONE TIRE & RUBBER CO. OF CANADA, LTD.

The One Hundred Percenter

Lady Astor, like Bernard Shaw, has the habit of saying startling things that make people think, says the Winnipeg Tribune. In the recent election campaign in Great Britain she struck a responsive chord in many minds when she said:

"It is the 100 per cent American and the cut-and-dried Englishman I fear. I think 100 per cent, citizens ought to be locked up. They are a danger to the world."

Everybody knows what a 100 per cent, or an cut-and-dried, is. He is to be found in more or less substantial numbers in every country, although his favorite stamping ground is the North American continent. The 100 per cent may be distinguished by several well-known characteristics.

In the first place, he holds as a great moral principle the immoral doctrine embodied by the famous motto, "May my country be always right, but my country right or wrong." This naturally scales down into "my state (or province), my city, my ward, my party"—and, not infrequently, "myself." In essence it is placing a nation, or a locality, or a group of persons associated together for some common cause, above every ethical or moral judgment of mankind, above the sense of right or wrong.

Another sign of the 100 per cent is a steadfast belief that everything that is American, or Canadian, or English, or Italian, is right, because it is American, or Canadian, or English, or Italian. The logical consequences of such an obsession is that he cheapens his country's flag by dragging it in and flaunting it on every possible occasion.

The 100 per cent is not all bad, of course. He merely fails to see that patriotism is not the cause but the result of a sound and honorable national life. He is the victim of current standardization of thought, which manifests itself in slogans and headlines. Not everyone would want to go as far as Lady Astor and have him locked up. Nevertheless he is a danger because his enthusiasm is rooted mainly in a mass of intolerances. And intolerance, as Lady Astor implied, is one great obstacle to civilized social progress.

And in civilized social progress lies the hope for the future peace of the world. If the American, the Canadian, the Englishman, the Italian insist upon the acceptance of their particular national views, and intolerantly refuse to see any good or virtue in the views of others, what hope can there be of the nations drawing closer together?

And if the 100 per cent doctrine is sound and right, and the 100 per cent is to have his way, what hope is there for the future of many nations of today? Take Canada as an example. If the 100 per cent, Westerner adheres rigidly to his views, declares he alone is right, but whether right or wrong, he will not budge from any position he has taken on fiscal or other questions, and the 100 per cent, Westerner adopts the same attitude, what will be the outcome of the Canadian Confederation?

Apply the same attitude of mind in matters of race, language, religion, and government in Canada, and in each of the provinces of Canada, becomes an impossibility. The 100 per cent would wreck everything if he does not have his own way.

All history proves that intolerance has been the cause of the world's greatest sorrows, the underlying cause of its bloodiest wars. Intolerance of race, intolerance of national customs, intolerance of religion, intolerance of social conditions, the 100 per cent in the ranks of employers and in trade unions, these are the real dangers in the world today as they were in the years that are past.

The 100 per cent, demagogue with a glib tongue and a reckless disregard for truth and fact by attracting the attention, playing upon the passions, prejudices and sentiment of those who are so swayed rather than guided by their intelligence, can undo the work of generations of statesmen, and render difficult and oftentimes impossible the work of the true reformer.

The man who boasts he is 100 per cent, this or 100 per cent, that is merely advertising the fact that he is intolerant in his views and narrow in his vision and conception of life. He may be sincere, but his sincerity is the outcome of his intolerance, and his intolerance has its foundation in ignorance and a prejudiced mind. As such he is a national danger.

To Test Air Television

Monoplane Has Been Especially Constructed To Try Out Invention

Flight tests will soon be made of television equipment calculated by its inventor, C. Francis Jenkins, Washington physicist, to reproduce conditions as seen from an airplane, on a screen miles away.

Moving panoramas of countryside—in wartime instantaneous recording at headquarters of observations made by planes back of the enemy lines—as broadcast by the "aerial television eye," will soon be a scientific reality, he said.

Successful experiments with the

new process have already been conducted with ground models from a fixed base, he announced, and a Stinson junior cabin monoplane had been specially constructed for practical test purposes.

Will Increase Empire's Trade

U.S. Tariff Likely To Divert Trade To British Dominions

Increased United States tariff against Canadian products will divert Canada's trade more and more to the other Dominions of the British Empire, believes Norton Francis, president of the Canterbury, New Zealand, chamber of commerce, and prominent business man, who is visiting Canada and the United States for the purpose of studying relations between the farm and city industry on this continent.

In an interview at Winnipeg, Mr. Francis said he does not think Canada can meet the tariff situation by further raising her own tariff scale, but should concentrate on increasing her manufacturing and inter-empire trade.

The moisture evaporated from a single white oak in a day has been estimated to be 150 gallons of water.

Can Measure Laughter

Machine Determines Whether Comedy Piece Is Success Or Failure

"John James, comedian, Lafograph 89," may be the form of card used by entertainers in the future, for a new apparatus has been invented to register the exact "strength" of the laugh or comedy in comic plays in a theatre or concert hall. It registers the truth and nothing but the truth. The machine will presumably have a figure to denote absolute efficiency, and should a musical comedy fail to come up to scratch it will not longer be possible to suspect that the failure was due to the critics. Also the critic's work will be made easier. Instead of praising an author's wit, or discussing a comedian's qualities, it will be necessary only to look at the end: "Lafograph 100, or 50, or 0," as the case may be. After a first night the public will be able to see the registered rise and fall of the needle—how it began at "litter," rose to the middle spheres of "chuckle" and "laugh," leapt to a higher "guffaw" or "scream," or reached the supreme heights of "screach."

PAINS IN THE BACK

These Are Usually Due To A Weakened Condition Of The Blood

The muscles of the back are constantly under heavy strain, and have but little rest throughout the day. They are therefore in need of all the more attention, and stretching the spine of pure red blood can give them rest. Unless they have this help, you will have backache and continue to have it.

Backache seldom or never means kidney trouble. It is nothing more than the tired, worn-out muscles of the back showing their exhaustion because of the lack of good, pure blood. The one guaranteed, most efficient blood builder is Dr. Williams' Pink Pills. When the blood has been improved through the use of this medicine, backache disappears. Dr. M. F. Fairburn, Essex, Ont., tells what Dr. Williams' Pink Pills did for him in a case of this kind. She says: "I suffered for nearly twenty years from backache. At times the pains were so bad that I had to walk half doubled over. I had tried several doctors with very little benefit. A friend urged me to try Dr. Williams' Pink Pills. For a day or so, the joy of once more being able to stand up straight without suffering intense pain. After using two pills a day there was no more backache. I used eight boxes in all and have not since had a sign of the trouble. I can do all my housework and not feel tired and worn-out afterwards. For this I thank Dr. Williams' Pink Pills."

If your dealer does not keep these pills you can get them by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Free Advertising

The firm of Golomon and O'Guillan had plots for sale in a suburb. O'Guillan — young, enthusiastic, was writing the advertisement. He urged impending purchasers to seize the passing moment.

"Napoleon," he wrote, "not only met opportunity; he created it!"

Mr. Golomon read this line in the advertisement slowly and carefully.

"This fellow Napoleon," he said, "what's the use of advertising him with our money?"

Powerful Medicines. The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Eclectric Oil, forming one of the most potent and effective tonics ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they, by their health and the wonder of its power, have expressed by the small price at which it sells.

Agricultural Machinery Sales. Agricultural machinery sales in Saskatchewan, which approximate \$50,000,000, annually, are increasing each year, owing to the volume of wheat and other grains produced, according to a departmental report.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lebret, Sask., writes: "For over a month, last summer, my little boy was suffering from summer complaints. He got so bad that he had to go to the doctor in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended

"D. Fowlers' Ext. of Wild Strawberry" and in despair I sent for a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he got sick."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

LEVEL CROSSING ELIMINATION IS BEING PLANNED

Ottawa.—The Board of Railway Commissioners, the road departments of the Provincial governments throughout Canada and the railways of Canada are making a joint survey of the level crossings situation with a view to a definite and comprehensive program of level crossing elimination.

The provincial officials are now engaged in classifying the crossings from the point of view of the degree of danger and the nature of the protection needed. When this has been done, the board, the provinces and the railways will confer and decide where the greatest urgencies lie. The most dangerous crossings will be eliminated or protected first.

The program to be drawn up will require from half a million to millions of dollars a year from federal government, which means an expenditure of two to three million annually. The grade crossing fund which has been replenished at the rate of \$200,000 a year for many years is proving insufficient since the campaign of the last few years, inaugurated by the Hon. Charles Dunning, minister of railways. At present it is down to about \$120,000 and Mr. Dunning will probably ask Parliament next session to increase the \$200,000 to the larger amount.

Under the provisions of the Federal government the fund, which is administered by the Railway Board, will pay up to 40 per cent. of the cost of any crossing elimination and protection.

Father Sought By Radio

Message Sent To Police Officer In Far North To Advise Him Of Son's Illness

Ottawa.—A sick child in a hospital here is waiting to reply from his father at the lonely Royal Canadian Mounted Police post at Chesterfield Inlet on Hudson Bay to a message broadcast over the Canadian National Railways Radio chain.

The message was to advise Staff Sergeant M. A. Joyce, that his 14-year-old son, Scott, is seriously ill here, and asking him to get in touch with Ottawa by radio if he can get to a sending station.

World's Population

Believe Population Will Be Doubled In Next 150 Years

Chicago, Ill.—Mankind probably will require at least 150 years to double the world's present estimated population, which is between 1,700,000,000 and 1,900,000,000, if fertility and mortality remain as at present. A mere doubling of the world's population however, will produce a striking change in the race composition, with a greatly increased percentage of Slavs. The population of North America, Western and Northern Europe, and Australia even now are no longer reproducing themselves.

Tourists Play Safe

Windsor, Ont.—"Don't shoot; I have no knife in this car." Banners bearing this surprising warning were plastered on the windows and rear windows of automobiles reaching here from Chicago and other Illinois centres. It evidently constitutes a novel manner of protesting against the alleged promiscuous shooting of "bootleg" suspects by American state police.

Rumor Is Denied

Ottawa.—A rumor that Canada has made an offer to the Newfoundland government for the purchase of Labrador was given official denial here. "In no way is it true," said Premier King, when the matter was drawn to his attention. The rumor indicated that the price offered by the Dominion government was one hundred million dollars.

Hon. Heenan Will Go To Edmonton

Edmonton.—Hon. Peter Heenan, federal minister of labor, will be in Edmonton shortly to sign in behalf of the Dominion government the necessary documents and agreements in connection with the old age pensions scheme, about to go into operation under the joint auspices of the two governments.

Non-Party Delegation

London, England.—With the decision to send a non-party delegation to the league of nations assembly in September, it became known that Viscount Cecil would probably be one of the delegates.

W. N. U. 1793

State Control Of Radio

Royal Radio Commission Makes Important Recommendations

Ottawa.—Government control of all broadcasting stations, elimination of advertising from the programs and that listeners pay the upkeep by licensees were advocated before the Royal Radio Commission at the final session here by the All-Canada Congress of Labor and the Canadian Legion of the British Empire Service League.

The Canadian Congress representatives also recommended that the present commission be continued or a similar organization be established vested with complete administrative control of radio broadcasting.

The Canadian Legion advocated a broadcasting organization that would develop imperial patriotism and Canadian culture. Canadians said the Legion briefly were being overwhelmed with foreign programs charged with propaganda.

The commission will at once begin the preparation of its report. It will probably be available about the end of the month.

Canada May Consider Relations With Russia

Communications From British Government Have Been Received At Ottawa

Ottawa.—Cable communications of a "general and preliminary nature," regarding the signing of the optical clause, and also bearing a resumption of diplomatic relations with Russia, have been received by the government of Canada from the British government, that was the extent of the information given out herewith respect to these matters which are accorded specific mention in the King's speech at the opening of the parliament.

Just what position the Canadian government is taking on the question of resuming diplomatic relations with Russia has not been stated.

It is considered likely, however, that Canada will support any such move.

Two Injured In Explosion

Faulty Water Jacket Burst In Jewish Orphanage, Winnipeg

Winnipeg.—A violent explosion, which shook buildings within a half a block radius, caused injury to two persons and one to die in the basement of the Jewish Orphanage on Matheson Avenue, north Winnipeg.

Many children are cared for at the Orphanage, but all escaped injury.

While a city water works employee was attempting to repair a faulty water jacket in the basement it exploded. The employee, George Bennett, was painfully hurt, while Mrs. A. Osovsky, wife of the Orphanage superintendent, suffered from arm injuries and shock.

It was first reported that fire had followed the explosion, but this was erroneous, though firemen from central and north stations were called out and aided in bringing the injured from the building.

To Cross Atlantic In Small Vessel

Five Cleveland Men Believe They Can Make Return Trip

Cleveland, Ohio.—The little power boat Karf, manned by five men who built it, put out from here on an adventurous attempt to cross the Atlantic to Europe.

The Karf, captained by Joe Lepisch, 31, a German Great War veteran, took on 500 gallons of gasoline and enough canned goods and water to last three months. Captain Lepisch intends to skipper her down the St. Lawrence river and then across the sea to Hamburg, Germany. "We will be in Hamburg in ten days. The Karf will make the trip there and back," said the captain.

New Chancellor Of Queen's
Kingston, Ont.—James Armstrong Richardson, of Winnipeg, head of the firm of James Richardson and Sons, was chosen as the new chancellor of Queen's University to succeed Sir Robert L. Borden, who resigned several weeks ago. Mr. Richardson's name was the only one to be placed in nomination and he was unanimously chosen for the post.

May Spend Winter In Africa
London, England.—The Evening News says it understands the King is considering proposals to spend part of next winter in one of the British dominions. South Africa, about which confidential inquiries already have been made, is considered the most suitable.

CROP CONDITIONS ARE VARIABLE REPORT REVEALS

Ottawa.—The telegraphic crop report issued by the Dominion bureau of statistics showed a wide range of conditions across the country. Crop prospects continue satisfactory over Southern and Northern Alberta. Warm weather with plenty of rain is needed in Saskatchewan and Manitoba. Fall wheat is excellent in Ontario. Scarcity of rain also is reported from Nova Scotia. The largest strawberry crop is expected in the history of British Columbia. Favorable reports are to hand from New Brunswick and Prince Edward Island.

Reports by provinces for the end of June:

Manitoba — Manitoba department of agriculture:

Crops started late on account of cool spring. Light rains last fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rainfall scattered and variable. Need heavy general rain over province. Propects fair.

Saskatchewan—Saskatchewan department of agriculture:

Growth was retarded in June by cool weather and lack of moisture and crops are generally behind the average. Although moisture conditions were improved toward the end of the month by rain, warm weather with plenty of rain, especially in the southern districts will be needed in July. In the Swift Current district wheat is week later than the average. Moisture supply varies widely. Will need good rains during next three weeks to make even fair crop.

Alberta—Alberta department of agriculture:

Crop prospects continue satisfactory over southern and northern sections of Alberta. Yield greatly reduced over central area but condition of coarse grains and feed improved by rains during past week.

Fall wheat very satisfactory in south. Good crop alfalfa ready for first cutting. Livestock condition good. Dairy production increasing with improved pastures.

Sugar-beet crop generally good.

British Columbia—British Columbia department of agriculture:

Weather during June has been cool with frequent showers which have generally benefited all crops. Grain crops making rapid growth and appear to be healthy and strong. Haying is general, but due to the cold backward spring the prospects are that the crop will be light. Root crops and vegetables are in splendid condition and making good growth.

Possibly the largest strawberry crop in the history of the province is being harvested, but prices are lower than last year. Raspberries and loganberries will yield approximately the same as last year. The yield of apples and other tree fruits will be about 25 per cent. less than last year.

PARLIAMENTARY SECRETARY

Discover Liquor Cache

Aeroplane Flows Up 20 Barrels Of Rum With Tail Skid

Sydney, N.S.—Plowing up 20 barrels of rum with the tail skid of his plane was the unique experience of Major-General J. H. MacBrien, when engine trouble drove him into a forced landing on a farm near here.

The cache was neatly hidden under sticks covered with sod, and had the Moth dropped a wheel into the pit instead of merely straddling it, the results might have been serious for the pilot and his guest, Dr. Freeman O'Neil.

Prince Sails For Home

Prince Henry Given Enthusiastic Send-Off At Quebec

Quebec, Que.—Prince Henry, Duke of Gloucester, concluded a month's visit to Canada, when he sailed from this port on the "Empress of Australia" bound for England. A flag draped ship and the presence of the Governor-General, Lord Willingdon, and Lady Willingdon on the dock heralded the Prince's departure, while citizens of the ancient capital turned out in large numbers and gave the King's fourth son an enthusiastic send-off.

Gold Rush Started

Report Of Strike In Northern Saskatchewan Causes Excitement

Big River, Sask.—The plager gold and platinum strike about 300 miles north of Big River is causing considerable interest at this point. About 100 men have left here, and over 400 from other points have gone to the scene of the new find. A number of parties are now outfitting at this point and will leave by burke and canoe this week.

The principal find is reported at Froisher Lake. An old prospector who just arrived here from the scene of the strike supplies reports that when he left over 500 claims had been staked around Froisher and Birch Lakes.

The route to the new placer field is by water, the entire distance being without portages via Big River, Isle La Crosse, Lake Deep River, Clear or Churchill Lake. All kinds of reports are coming in as to the richness of the new finds, one report stating that \$17 was washed from one shovel of dirt.

Envoy To Japan

Hon. Herbert Marler Will Deliver Several Addresses In West

Ottawa.—Places at which Hon. Herbert Marler, Canadian minister designate to Japan, will speak on his trip west from Montreal on July 14, have been announced here.

On his way to British Columbia, Mr. Marler will speak at Toronto, Oshawa, Hamilton and Fort William, Winnipeg, Regina, Calgary and Jasper Park. In British Columbia where he will spend most of his time before sailing on August 29, he will speak at Victoria, Nanaimo, Duncan, Port Alberni, Penticton, Kootenay Landing, Kimberley, Windermere, Kelowna, Steams and Victoria.

PLAN TO SOLVE LABOR PROBLEMS IN GREAT BRITAIN

London, England.—In debate on the address in reply to the Speech from the Throne, Right Hon. J. H. Thomas, Lord Privy Seal and minister of employment in parliament outlined the government plans for reducing the volume of unemployment in Great Britain.

Thomas must not be considered with a view merely to giving work but also from the standpoint of stimulating trade at home and abroad, he declared. "What we import we should make for ourselves," he asserted and cheered from the opposition benches.

Mr. Thomas continued that the railways imported track sleepers when examination had shown that only technical difficulties prevented them from using steel sleepers which could be made in Britain.

Road crosses costing \$187,500,000 and providing work for five or six years would be speeded up. Mr. Thomas said, adding that this government's contribution would be paid out of the road fund.

Arrangements would be made for the immediate re-construction of the Waterloo Bridge on which depended the great Charing Cross bridge scheme which would involve expenditure of \$55,000,000. Other schemes to be submitted to the railway companies were for the electrification of the Great Eastern Railway suburban line running out of Liverpool Street station, tube extensions, improvements in docks and harbors, and a freight railroad around outer London to avoid cross-London traffic.

The natural resources of the country would be developed, including land drainage, reforestation and fisheries.

Mr. Thomas declared he was seriously considering a proposal to make Scotland more attractive and thereby enable "our American cousins to come to the shire of the Scots," a statement that caused laughter.

Mr. J. H. Thomas announced he was going to Canada when Parliament rises at the end of the present month to discuss with the Canadian Government the subject of British migration to Canada.

The minister stressed that in any discussion of migration with the Dominion, nothing would do more harm than the suggestion that Britain wanted to solve her unemployment problem at their expense.

"They will resent it and resent it bitterly," he said. "I believe migration is a problem that has to be negotiated on the spot. It is something which has to be discussed in all its bearings, because anyone who has visited Canada and knows it as I know it, knows perfectly well the remarkable change from an agricultural to an industrial population that is taking place there."

"Hitherto our migration schemes have been based on the assumption that agriculturists alone were wanted. That is not true today. Equally, labor there has safeguarded its position by saying no, we are not going to have people forced on to us to lower and break down our standards."

"I propose to visit Canada myself immediately the House rises to discuss the whole problem."

VISCOUNT CECIL ON DELEGATION TO GENEVA

London, England.—Cheers from the Labor benches greeted the announcement in the House of Commons of the appointment of Viscount Cecil again to represent Great Britain at the Preparatory Disarmament Commission of the League of Nations and to attend the forthcoming assembly of the league.

The league assembly delegation also will include the following:

Right Hon. Ramsay MacDonald, prime minister.

Right Hon. Arthur Henderson, secretary for foreign affairs.

Right Hon. Wm. Graham, president of the Board of Trade.

Mrs. M. A. Hamilton, Labour M.P., Blackburn.

Helen Maria Swanson, speaker, lecturer and publicist.

Viscount Cecil, who was secretary of state for foreign affairs and minister of blockade in the wartime coalition government, and later became Lord Privy Seal in the Baldwin Conservative government in 1923 and 1924, had considerable experience at Geneva as a British spokesman. He resigned from the disarmament government shortly after the collapse of the tripartite naval conference at Geneva in 1927.

A protest was raised from the Conservative benches after Mr. Henderson had announced the delegation. The Conservative members said it was the first occasion, when with the "doubtful exception of Viscount Cecil," the British representation was entirely made up of representatives of one party.

Mr. Henderson claimed, in reply, that by Viscount Cecil's inclusion, he had fulfilled the undertaking to follow the precedent set in 1924 when the delegation was not strictly of a party basis.

Airmen Have Narrow Escape

Privately Owned Plane Made Poor Landing Near Melfort

Melfort, Sask.—Two occupants of a privately owned airplane narrowly escaped injury when their machine made a poor landing on the shores of Windsor Lake, a few miles south of here. The plane was seriously damaged. In attempting to land, the plane skinned over the roof of a house, barely cleared a grove of trees and struck the ground with the right wing first. R. Leadhitter and O. P. Brownfield extricated themselves from the wreckage without difficulty.

Killed By Artillery Shells

Two Accidents Cause Death Of Five In Poland

Warsaw.—Two accidents involving heavy artillery shells killed five persons and injured a number of others in Poland. In one case two country boys found a dud on a Russian-Austrian battle front near the village of Luck. They took it home, where it exploded, killing a family of four and wrecking the home. The other accident occurred near Cracow, where, in artillery practice, a shell landed in a group of military observers, killing one and injuring several others.

Opposing Higher Tariff

Washington.—The administration is bringing pressure to bear upon senators and congressmen to prevent increases in tariff duties which would be detrimental to United States foreign trade, well informed circles here believe. It is understood that Canadian trade is the particular concern of the administration.

Injuries Proved Fatal

Los Angeles.—Gladys Brockwell, motion picture actress, died of injuries received in an automobile accident. Her physician said death was due to peritonitis which developed as the result of internal injuries.

Dominion Rifle Meet

The annual Dominion Rifle Association meet will be held this year from August 12 to 17, it was announced recently. The meet will be held at the Connaught Ranges, Ottawa.

Favors Arms Cut

Tokio.—Admiral Ito Akarade, minister of naval affairs in the new Minamoto cabinet, in an interview, pledged support to further limitation of naval armaments.

In England, 2,500 armaments are being delivered to new comers every week.

Issued by authority of
Honorable Charles Stewart,
Minister of the Interior.

NOTES AND COMMENTS

Sowing the seed is necessary to secure a good crop, but there are many factors that enter in before the result is known. Cultivation, moisture, freedom from insect pests, are all necessary to ensure a crop. So it is with business. Just because you have a store in a town it does not follow that business is going to come to you without effort. You cannot constantly be taking something from a town without putting something back into it. Persistent effort, the cultivation of good will, judicious advertising, taking an interest in organizations that have as their object the promotion of community welfare, membership and activity in the work of the Board of Trade, these are necessary if your business is to thrive and prosper and be known as a progressive institution and not merely interested in trying to get all the business you can from the people, but having a wider interest in rendering service which has its reward in building up good-will.

It was of interest to note in a recent news despatch that school trustees of Magrath stated that unless teachers on their staff attended summer schools to improve their methods, their applications would not be considered. This undoubtedly will make for efficiency. In a two months vacation, there should be time for a brief period of instruction, and though it may not be necessary for a teacher to attend these schools every year, yet the ambitious teacher who is striving to advance will take advantage of the summer school and so increase her own value as a teacher that the resultant higher reward would naturally follow. School boards are not oblivious to the value of efficiency in teachers, and results are closely scanned by trustees and parents alike.

Coleman Citizens Band represented the town in the Calgary Exhibition and Stampede parade on Monday, and also in the annual band competition, but they were up against stiff competition, there being nine bands. But though the boys failed to bring home a prize, they deserve credit for making the attempt. In the face of many difficulties, they strive to keep alive the spirit of band music, which is not an easy task, and there is at least the added value of the part they play in keeping the name of Coleman before the rest of the province. Bandmaster Fulton and his comrades deserve our thanks and encouragement.

The maintaining of a tourist camp by a city or town is a debatable topic, some being for and others against. The value of a properly maintained tourist camp from an advertising standpoint, and at which a charge is made for the service given, is exemplified in the following letter which was published in the Fernie Free Press.

"Mr. and Mrs. V. L. Daily from Paradise Hill, Sask., accompanied by Mr. and Mrs. H. Bushfield of Calgary, while enjoying a trip through the Rockies, wish to say the two days spent at Fernie were the most pleasant days of our trip. As well as the lovely tourist camp and the beautiful mountain scenery we had the pleasure of seeing two real snappy baseball games, both won by Fernie. The Fernie tourist camp is splendid, cabins and kitchen are nice and clean and the rates are only \$1.00 per day. C. Stephenson, the caretaker of the camp, makes you feel as though you were at home and gives you the best attention in every respect, so wish to advise any tourist to make this their resting place."

Though the cares and various details of business each day occupy the pre-eminent place in men's minds, yet time must be taken to gain a little fresh inspiration each day from our surroundings, or life becomes merely a mechanical process and we are liable to become embittered or harsh. To continue in a hurried rush with thoughts centred on business alone robs the individual of a great deal of happiness and leisure which is necessary to make life worth living. Life is indeed what we make of it, no matter if we be earning a thousand dollars a year or a million, for happiness is that intangible something which cannot be purchased, but lies within the power of each individual to enjoy.

People are often heard to lament the fact that very few people go to church. Perhaps a little heart-searching on the part of the church to find why it does not attract people would help to solve the problem. An interesting article in this week's Literary Digest giving Labor's views on the church, being the opinions of prominent Labor leaders, is very interesting and enlightening as to official Labor's view on the church in its relation to the life of the worker and the toiler.

Vacation time is now in full swing—and many find enjoyment in the hills and fishing the streams.

Another List of Re-Conditioned Cars

1925 Chev. Coach, first class condition	\$450.00
1927 Chrysler Coach	\$595.00
1928 Chev. Sedan	\$785.00
1928 Essex Sedan, with trunk	\$825.00

All these cars are in good mechanical condition and can be purchased on the liberal time payment plan.

3-Piece Chesterfield
and
Electric Orthophonic

A handsome Chesterfield Suite consisting of settee and 2 chairs beautifully upholstered in brown and valued at \$375.00 is the grand prize at

Coleman Community Carnival. It is on display in Pattison's hardware store, and tickets are 25¢ each. Books of 20 tickets \$4.50.

Your Chances
are good---
Now's the
Time to Buy

The second prize is an Electric Orthophonic Victrola, valued at \$155.00,

on display in Powell's jewelry store. Buy your tickets early.

Coleman Band at Calgary Stampede

Boys Failed to Land Prize Owing
to Lack of Sufficient
Players

With only sixteen players Coleman Band were handicapped in the contest at Calgary on Monday, though for the number playing they acquitted themselves very creditably, as did their failure to land a prize was entirely owing to lack of instrumentation, other bands having as many as 40 and 45 players.

A very good picture of the band, in their uniforms, is shown in the Stampede parade, with the banner being carried ahead of them, with the words "Coleman Band". When the difficulties are considered under which the band has labored, they deserve credit for entering in the competition.

The band is under the leadership of Jas. Fulton, who has spent a lot of time during the last two years in keeping the band together and conducting rehearsals.

Petty Pilfering in Stores is Serious

The extent to which quite young boys and girls are stealing goods from stores shows the necessity for not only close vigilance but that an example be made of those found guilty. A. E. Knowles novelty store, it is reported, threatened action this week against some boys suspected of stealing, and within a short time the mother of one boy brought in the money for the goods that had been stolen.

Miss Ida Thom, employed in the Coleman Bakery, reported to Sgt. Jones of the A. P. P. the theft of a wrist watch which she had laid down in the store, and having her suspicions as to where it had gone, laid information, with the result that in a very short time afterwards the thief was discovered and the watch returned.

Other stores report similar losses, and it is very evident that the Juvenile Court will have some offenders to deal with if this practice is not checked.

It is these small thefts which lead young people into more serious crimes, and therefore in their own interest it is necessary that the error of their ways be impressed on them in a very forcible manner.

J. S. D'Appolonia has been awarded the contract for a new school building at Pincher Creek. He recently completed the contract for the Canadian Bank of Commerce at Willow Bunch, Sask.

W. H. Moser, Hillcrest Teacher of Violin

will start a class in Coleman in September.

For terms, please write to above after August 15th.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Beiby Alston, British ambassador to Brazil since 1925, died suddenly in a London hotel, aged 60 years.

Sheep from the famous flocks of His Majesty King George are being imported on Vancouver Island and will be pastured in the Sooke Hills.

Two cargoes of Canadian grain have left Vancouver for Vladivostock. This is the first movement of this commodity to a western Siberian port in years. It is expected that a further cargo will go forward shortly.

London morning papers say the much-talked-of agreement between British and German film groups had been signed with involved capital amounting to approximately 60 million pounds sterling, or \$300,000,000.

Marius Pollon, one of the most noted military test pilots in France, was killed instantly when his plane crashed because of a broken wing. His parachute failed him after the pilot had leaped from the plane.

A caldron of grease, which over-turned and ignited in the main gallery of the Hamburg-American liner "Deutschland" furnished a stirring finish to an uneventful Atlantic crossing for 350 passengers.

Expanding trade in the New Westminster area is seen in the recent shipment of a large consignment of raw flour from a factory at New Westminster and canned milk from the Fraser Valley to the British West Indies market.

A Chinese-British agreement has been signed providing for the training of Chinese naval cadets in Great Britain and to the furnishing to the Chinese government of a British naval mission in development of the Chinese army.

Hulman's Limited, of Vernon, B.C., has started construction of its new dehydrating plant and it is expected that the factory will be completed in time to handle the coming season's crop. Machinery is already moving in.

A shipment of purebred cattle consisting of 25 head of Guernseys purchased in Wisconsin and Illinois, by D. E. Runkle, of Regina, have been placed on the Plot Butte stock farm near Regina. The shipment is valued at \$10,000.

Has Gained Popularity

ESSAY Contest Teaching Toledo School Children Facts About Canada

A Canadian essay contest in the Toledo, Ohio, schools, sponsored by Edmund G. Odette, M.P., for East Essex, has gained such popularity in that city that one of the newspapers now is carrying a daily feature entitled "Facts About Canada."

"Canada," one of the Toledo papers pointed out, "is a nation of home-owners in the farming district, 78 per cent of the people owning their own homes."

Other facts listed from day to day, deal with Canada's natural resources, its hydro power, its fishing and its industrial enterprises.

The competition among the Toledo school children was started last fall when Mr. Odette, addressing the North Toledo improvement association, offered to pay the expenses of a trip to Ottawa for the author of the best essay on "Canada."

The proposal received such a favorable reception in Toledo, that the chamber of commerce there offered to like-weise for a second student. The object of the essay contest and the trip, is to promote a better understanding between the people of the adjoining countries.

If all oyster eggs hatched and survived, in five generations their shells would make a pile twice the size of the earth.

THE SOUNDING FILM.

Producer: "Jump!"
Actor: "But I see no mat!"

Producer: "Of course, not. This is a sounding film. We have to reproduce your thud on the pavement!"—II 420, Florence.

W. N. U. 1708

A Pleasing Incident

Deaf and Dumb Children Are Entertained To a Lecture

This pleasing and pathetic little incident took place in Montreal recently—at the largest health exhibit ever shown in Canada, when the Canadian Social Hygiene Council assisted the Montreal Federation of French Health Agencies in a financial drive.

Morning, afternoon, and evening, health lectures were given, thousands of school children being carried free on the street cars. And one day they brought all the little deaf and dumb children in Montreal.

They gathered that silent company in the big lecture hall, and placed them in little groups of fifteen or so, with their lady teachers. Each teacher faced the lecturer, and the children solemnly looked at their teachers. And then the lecturer began to speak to the children, while they stood, unhearing, and watched their teachers.

He spoke only a few sentences, and stopped. And all the teachers began to move their fingers, translating the lecture. The children's eyes followed eagerly as they understood the words that were being relayed to them, their own native language that they could not understand until it was translated into motion.

Children are notably fidgety at lectures, but not these youngsters. To see how they enjoyed every minute of it was enough to bring tears to many eyes that watched them. They were being brought into closer touch with the world of their voices; playmates; their partial isolation was being temporarily broken down. To each of them, that lecture was a big event.

Recipes For This Week

(By Betty Barclay)

GOLDEN ORANGE FROSTING

Grated rind 1 orange.
3 tablespoons orange juice.
1 teaspoon lemon juice.
Yolk of 1 egg.
Confectioners' sugar.

Mix grated orange rind with fruit juice and let stand 15 minutes. Strain into beaten egg yolks and add enough sifted confectioners' sugar to spread.

HAMBURGER EN CASSEROLE

2 lbs. of round steak ground

or
2 lbs. of lean hamburger.

2 large onions.

2 large peppers, green or red.

1 large lemon.

1 8 oz. bottle tomato catsup.

1/4 lb. more of bacon according to taste.

Salt and pepper.

Butter your casserole dish or pan and lay about 1 1/2 inches of hamburger in bottom.

1 layer of one onion thinly sliced.

1 layer of one pepper thinly sliced.

Juice of half lemon.

Salt and pepper to taste.

Repeat until the meat is used, making the second layer of meat about one inch thick, this will give enough hamburger left for about 1/2 inch thick on very top. Pour a whole bottle (8 oz.) of catsup over and strips of bacon. Bake slowly in modern oven for one hour and a quarter.

Early oil wells at Baku were scooped out by hand.

PREMIER FERGUSON CHRISTENS AEROPLANE

Premier Ferguson, of Ontario, christening the "Imperial," a Gypsy Moth plane, presented to the Aviation League of Canada by Imperial Oil Limited, at the opening of the Hamilton Airport recently. The plane is being used by Major-Gen. J. H. MacBrien, C.B., C.M.S., D.S.O., in his travels about the country in the interests of aviation.

COL. CHAS. LINDBERGH AND HIS BRIDE

Photograph shows Colonel Charles Lindbergh and his bride, formerly Miss Anne Morrow, daughter of D. W. Morrow, United States ambassador to Mexico, at Mitchell Field, L.I., where they witnessed the test flight in the Daniel Guttenheim safe-aircraft competition. This is their first appearance since their marriage on May 27. Col. Lindbergh is a trustee and consultant of the Daniel Guttenheim Fund for the promotion of aeronautics. Hundred Million Sheep

Australia owns 100,000,000 sheep, which, although less than one-seventh of the world's flocks, produce annually nearly one-third of the world's wool. It is estimated that 80,000 families in Australia own sheep.

Figure It Out

"Which is the most valuable a golden sovereign or a \$1 note?"

"The note, because when you put it in your pocket, you can double it."

"Quite right. And when you take it out you find it increases."

If the city of Duluth, Minn., were moved to Nevada, the state would nearly double its population.

SUNDAY SCHOOL LESSON

JULY 14

EZEKIEL TEACHES PERSONAL RESPONSIBILITY

Golden Text: "Each one of us shall give account of himself to God." —Romans 14:12.

Lesson: Ezekiel 18:1-32; 33:1-20.

Devotional Reading: Psalm 125.

Explanations and Comments

The Front's Responsibility, verses 7-8—Ezekiel is set to be a watchman unto the house of Israel. He must hear the word of Jehovah and he must proclaim it; for as a watchman he is responsible for warning the people of the consequences of sin. He must know that God punishes wickedness, and he must warn the wicked from his way. If he fails in his duty, he will bring the wicked man down in his iniquity, the prophet is "blood guilty" accountable to God for that man. However, the prophet warns the man and the man fails, the prophet has "delivered his soul"; he is free from guilt in the matter. His was the responsibility, not of producing obedience, but of uttering the warning. Recall how Paul declared to the elders of Ephesus that he shrank not from declaring unto them anything that was profitable, and later, in his second letter to Timothy, to house to house, testifying both to Jews and to Greeks, repantance toward God; wherefore he testified unto all men that he was part from the blood of all men, for he had ceased not to admonish every one night and day with tears, Acts 20:17-31.

"No one of us is free from the dangers of spiritual obligation too lightly. If we are Christ's disciples at all, there is committed to us the word of reconciliation." We are put into the world with a gong which is intimately connected with the destinies of men. It is within the power of those who make an effort to interfere with those who hear him, and when our efforts fail, we depend their opportunity of realizing the only way of escape and life. And yet how often are we content with something much less passionate than the service of a true watchman!" —J. Stuart Holden.

Winnipeg Newspaper Union

THE SPORTS MODE

A youthful interpretation in charcoal green pleated silk crepe skirt, with semi-sheer shaded bias and novelty striped sheer shoulders. The slender bow of silk crepe is its sole trimming. It is easily made, as is noted in small sizes and one of the smartest ideas for sports wear. It is freely made of georgette crepe, crepe satins, chiffon voile, chiffon, flat silk crepe, silk plique, and men's silk shirting. The blouse is also easily designed in sizes 18, 20, 22, 24, 26, 28, 30, 32 and 42 inches bust measure. Size 36 requires 2 1/2 yards of 36-inch material for separate skirt and 2 1/4 yards of 36-inch material for separate camisole. Price 25 dollars in stamps or coin (coin preferred).

Heating By Radio

Centralized Stoves No More Impossible Than Sending Music Around World

While some, perhaps many, of the wonders prophesied for days to come may be far-fetched and foisted on a gullible public, all the amazing triumphs of the modern age were once in a similar case. Had anyone foretold the coming of radio not so long ago, ridicule would have been his portion. So the telephone was a miracle in its day, and the type-writer had to fight its way into universal use. Who could have foreseen the place the automobile was destined to occupy from its first examples or induced people to believe that white coal could be harnessed for the service of mankind. Now we are told that radio will bring light and power to our homes and industries and provide heat as well. Centralized stoves are no more impossible than sending music round the world without visible agency.

Just one stove for the entire city and that raised 1,000 feet in the air, is the possibility announced by Paris, France. The scheme entails the establishment of wireless energy to be sent from the top of the Eiffel Tower. In each house there would be set up a machine, like, yet unlike a radio, that would intercept the waves, and transform them into heat and become a radiator to warm the rooms. The proposed system would consist of 400 to 500 coils in waves of two to three meters' length. All that is needed is to place on the receiving波 a filament that the wireless wave will raise to incandescence, and you will have your stove unit. Given enough such filament units and you have your heating or cooking stove minus coal, oil, gas or wired electricity.

Sale Of School Lands

Great Interest Shown In This Year's Auction Sales Held In West

Unprecedented interest was manifested in this year's auction sales of reserve school lands in Saskatchewan and Alberta. Attendance at the various points where sales were held was high, and reached 1,000 at some points. Many farmers acquired additional land adjoining their present holdings for the purpose of extending their operations, or to make provision for their sons. Many of the buyers of these lands were "new Canadians," who have prospered in western Canada.

In all, some 738,000 acres of land were sold, for a total of \$10,162,820. Prices paid ranged all the way from \$8 to \$70 an acre. In Saskatchewan, 4,662 parcels were sold, the average price being \$12.81 per acre, and in Alberta 63 parcels, the average price being \$13.53 per acre. Two of the heaviest sales were at Assinibola, Sask., where \$140,000.00 was realized, and at Rosetown, Sask., where \$1,216,000.00 was taken.

Grandmother Says

"That when she was a wee, tiny baby and her mamma did not have enough milk to nurse her, she gave her Eagle Brand Milk, which made her strong and healthy—and now my mamma is giving me Eagle Brand and I have gained over half a pound a week since I was three months old."

The high quality, uniformity and economy of Eagle Brand make it the first choice for cooking and table use.

If your baby is not gaining in weight as it should, if it cries or is fretty or restless, something must be the matter with it.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 140 St. Paul St. West, Montreal, and they will send you free, of charge, a very helpful baby welfare book containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

After a night of revelry at a New York up-town night club, Marcus, the famous revue producer, takes a party of four to Blackie Joe's down-town club, which stays open until sunrise. They are seated at a "ring-side table," by Al, the famous Blackie's chief comedian and singing waiter, who takes their order for beer. Al is the one called Marcus' "beauty." He is the prettiest girl he is devoted to, and really in love with him, but he does not see that. Al fills the order for beers and on his return to the bar sees Molly, the ballad singer, who is the "beauty" of the moment. He moves toward her as if drawn by magnet. He is in love with her, but Molly is indifferent to him.

CHAPTER III.

Al entered Molly's dressing room, depositing his tray of beers on a nearby stand. He forgot the drinks, forgot the party of fashionably dressed men and women who were impatiently waiting for them in the big room outside, forgot everything except the girl he adored—Molly.

He stood quietly by her side for a moment, saying nothing. And Molly, the ballad singer, continued deftly the business of making up, as she sat before her dressing table. She wished to goodness that this singing waiter, who was always composing silly songs, would transfer his affections to someone else. But, finally, she couldn't escape the penetrating insistence of his eyes as he gazed over her shoulder at her decidedly attractive reflection in the mirror. She turned her head with a sigh of resignation, and said ambiguously:

"Ain't love grand?"

Al did not know quite what she meant by that. If she were spoofing him, well, she could—he didn't mind. Whatever she did she couldn't prevent his loving her. But now her remark unlocked the flood gates of his speech.

"I can't help it, Molly, if I'm crazy about you," he whispered ardently, coming still closer. "I've been that way ever since the first time I saw you. I think you're the most beautiful girl in the world—on the level, I do!"

Al longed to reach out and stroke her glossy golden hair; he wanted to catch her beautiful little white hands and pull her close to him. But he realized he couldn't do that now;

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines irritable. All will end instantly. The best form is Phillips' Milk of Magnesia. It is a safe, harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

the corridor and saw his singing waiter in earnest confab with Molly. Blackie took the situation in at a glance, but decided not to bawl out Al. After all, when a man's in love, you must expect him to be bally, reasoned Blackie, and he went to the doorway and said, not unkindly:

"Come on, Al—on the job."

Al turned to his tray of beers but, before picking it up, thrust his precious song on Molly's dressing table before her.

"Read the words, please," he begged and, catching up his tray vanished.

Blackie Joe stood nonchalantly in the doorway, one hand thrust into his trousers' pocket, staring after Al's retreating back. Then the proprietor turned to Molly.

"Molly, do you stay tonight. Marcus is out in front."

Molly straightened as if touched by an electric shock. Al's trace of boredom vanished.

"Shut my mouth, Blackie! You don't mean it—not Marcus who put on the roof review?"

"No one else but," said Blackie, nodding delightedly.

"Molly, Molly's eyes was replaced by a cool, calculating stare. Marcus was outside—what an opportunity! Marcus, whose approval means fame!"

"Blackie," the begged, "introduce me?"

Blackie nodded—"Okay, I'll do that—and returned to his floor show. Two boy hoopers were strutting their stuff near the Marcus table, while Al was serving the belle.

As Blackie came closer, he heard Marcus' protesting voice:

"There's a fly in my beer!"

Al leaned over, quick as a flash, and answered:

"Sh-h! Not so loud—they'll all be wanting them."

Marcus turned away in annoyance. Al shouldn't wisecrack that way with such a man, thought Blackie. It was all right with the regular patrons, but not with anyone like Marcus. But before Blackie could smooth things out, Al had picked up the glass and hurried off to bring a new beer.

At the bar doorway he again confronted Molly—in her most gorgeous costume, garbed for conquest:

"Molly, did you like it?"

"My goodness! Will you sing it?"

Molly's eyes flashed in sudden anger. "For heaven's sake, Al, let me alone! I've important business on tonight. I didn't read it and I won't sing it! That's flat!"

As Al receded before her lashing words, his gaze dropped. His song lay on the floor—under Molly's slim, high curving heel!

(To Be Continued.)

Canadian Is Head Of Air Corporation

Graduate Of Toronto University President Of World's Largest Aviation Concern

Clement M. Keyes, a native of Chatsworth, Ont., and graduate of the University of Toronto, is to head the largest aviation concern in the world. This became known coincident with the announcement of the Wright Aeronautical Corporation, Curtiss Aeroplane and Motor Company, of which Keyes is president, and ten affiliated companies.

The merger which is to be effected through the formation of a holding company—Curtiss, Wright Corporation—brings together the business founded by America's three pioneers—the Wright brothers and Glenn Curtiss.

Curtiss Wright Corporation will have assets of \$70,000,000, but at current market values it will rank as a several hundred million dollars concern.

Mr. Keyes is to be president of the new holding company. Mr. Keyes, who is 54 years of age, is of Irish and Welsh descent. Graduating from Toronto University in 1897, he came a few years later to New York. He entered newspaper work in Wall Street in 1901. In 1911, he established a book business. From there, he stepped into the aviation industry, becoming president of Curtiss Company.

Most Important

"I suppose there are many problems which Polar explorers seek to solve?" said the unscientific man.

"Yes," replied the scientist, "a great many."

"What is the most important one?"

"Getting back."

Michigan has by far the greatest coastline of any state.

In Czechoslovakia 15,000 persons are engaged in tobacco growing.

W. N. U. 1793

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful drugs are not good for you. You may prove this for your own sake. It may save a great many disgruntled hours. Be sure to get the genuine Phillips' Milk of Magnesia. It has been prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Mountain Being Eaten Away

Oxen in South Africa Find Salty Clay Palatable

Oxen have eaten away 10,000 tons of earth from the side of a mountain, near Pretoria, South Africa.

Natural salt deposits, which cattle are fond of licking, are common all over the world, but in this case the animals have apparently been making whoop and satisfying meals from the earth itself. So far they have made a cave 10 feet high and 90 feet across deep into the mountain—and they are still eating.

They are still eating. They have already given up eating grass, though they still keep the appearance of being thoroughly fed.

Samples of the earth from the cave have been sent to Johannesburg analysts. It is easily crumbled into fine dust and is practically tasteless to the human tongue. Experts state it appears to be a clay containing potash and mineral salts, which would make it attractive to cattle with an abnormal appetite.

Made Police Doubt

Finger Print System

Clever Crook Found Method To Puzzle Police Of Three Continents

The finger print as a means of identification has ceased to be infallible. Quite apart from the ordinary use of rubber gloves, there is at least one case on record of a crook who threw doubt upon the whole international system of this method of identification. This criminal was Louis Cibolliere, a French doctor who disgraced himself in the profession, served a sentence in prison, and then became a burglar. Once outside the prison gates he set himself to the task of finding a method to thwart the finger-print system. He used his professional knowledge to secure a job in the School of Medicine at Lyons. There, with great skill, he contrived to take the skin from the thumbs and fingers of a corpse, being careful afterwards to hide his handwork by applying chemicals that speeded up decomposition.

He then mounted the skin on specially made parchment and set upon it a series of audacious burglaries. He delved in, left finger prints of a known, but dead, crook. His method of using the gruesome device was first to press it against his chest and so moisten the skin for the impress, and then lay it over various articles in the room where he had committed the burglary. Cibolliere confessed to all this on his deathbed; but not before he had given the police of three continents very grave reason to doubt the reliability of the finger-print system. The professional crook of today is very often a man of scientific attainments, but they are matched against equally clever brains.

Density Of The Stars

The enormous density of certain stars was the theme of an address recently given before the Institute of Mechanical Engineers in London, by Prof. A. S. Eddington. "There are three or four stars known to us which are believed to possess marvelous density. The best-known of these is the companion of Sirius.

The density is 60,000 times that of water; and they are matched against equally clever brains.

Has Overcome Handicap

How a 17-year-old Toronto boy, paralyzed since infancy and unable to write, dictated his matriculation examinations has been described by Premier Ferguson. He answered questions in the presence of the provincial registrar and is expected to obtain good marks.

Discover Old Dinosaurs

The skeletons of dinosaurs believed to be 90,000,000 years old yet well preserved, were discovered by Dr. Sven Hedin, world-famous Swedish scientific explorer, during his recent expedition to the Gobi desert, he reported on his return to Victoria, B.C., from Asia.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which parasites and worms and these parasites cannot exist together. They come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Strength is imparted to the organs and the health of the child steadily improves.

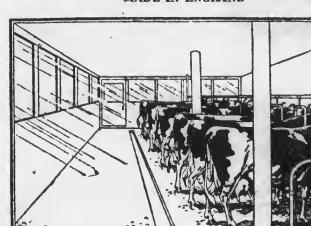

Lake Titicaca in Peru, 12,644 feet above sea level, is the highest point in the world where steamers are found.

Minard's Liniment for Rheumatism. Of the 12 biggest banks in the world eight are said to be British with five of them in London.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses and all our buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is more heat-resistant than glass for verandas, school factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. It is 100 per cent. sunlight and weighs only 36 lbs. per square yard. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.30 per Square Yard, f.o.b., Toronto.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital rays giving rays. Therefore, the invention of WINDOLITE has definitely assisted the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass that it freely admits the Ultra-Violet rays. WINDOLITE has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, instead of darkening in the sun.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulant to poultry breeding, increased the egg-laying capacity of hens, and has greatly improved the health of cattle and is now being used in domestic and household requirements.

Little Helps For This Week

"I will lay down My life for thy sake."—John xiii. 37.

Many loved Truth, and lavished life's best oil
Amid the dust of books to find her. Contented at last, for guerdon of their toil
With the cast mantle she hath left behind her.

Many in love sought for her, Many with crossed hands sighed for her; But these, our brothers, fought for her.

At last dear perl wrought for her, James Russell Lowell.

The seeds of truth sown by great and loyal men bear fruit through all the years to be. To have lived and labored and died for the right, nothing can be sublimer.

Druggist and Stationer

Reported Safe

Mrs. T. B. Smith received word that her brother, Mr. Cain, who is deputy minister of forests and mines in the Ontario government, and who is one of the party making the trip into northern Ontario to negotiate the treaty with the Indians for the ceding of 120,000 acres of land, was safe and was not an occupant of the plane that recently crashed while on its way north. The plane which crashed with the loss of one life was a Dominion government plane, while the plane he was travelling in was one of the Ontario government planes.

Death of Mrs. Harry Wilton Clark

The death took place on July 4th at the residence of her parents at Didsbury, of Mrs. Harry Wilton Clark (nee Leismer,) after a long illness. In addition to her husband the deceased lady left one daughter, Dorothy Jane. Mrs. Wilton Clark was a graduate of

Alberta University. The funeral took place from the family residence at Didsbury on Sunday. Mr. Harry W. Clark of Coleman, and his son Hubert from Taber, were there.

In connection with the death of Mrs. Wilton Clark, Mr. Harry W. Clark, on behalf of his son and the relatives of the deceased wish to express their heartfelt thanks for the beautiful wreaths and expressions of condolence sent from friends and lodges in Coleman.

To Start Northern Aerial Service

Plans are announced by the Western Canada Airways for the opening of an office in Edmonton with Lieut. C. H. Dickens, holder of the McKee trophy, as district superintendent. This move is in preparation for northern expansion and the establishment of air mail service on the prairies during the coming fall. Two of the company's planes, it is stated, will fly on regular schedule between Edmonton and points on the Mackenzie River providing service for the far north areas where much exploration work is being carried on.

A Great Car for Women to Drive

woman who drives a car.

THE FORD CAR is a great car for women to drive not only because it is so smart and good looking, but also because of its comfort, ease of control, and reliability. Especially its reliability.

You know the Ford will take you there and bring you back. You know you can depend on it. You know it was built to give you thousands of miles of faithful, uninterrupted service. This freedom from trouble—this mental comfort—means a great deal to every

Another feature of the Ford that appeals to women is the safety afforded by the fully enclosed efficient six brake system, steel body, and shatterproof glass windshield.

You can see the value of this when you consider that 65% of automobile injuries are caused by flying glass. The windshield of the Ford will not shatter under the hardest impact. A demonstration drive is convincing.
